EDUCATION

Bachelor of Science in Computer Science, Saint Joseph's University

08/2024 – 05/2028

Philadelphia, Pennsylvania

GPA: 3.93

Relevant Coursework: Discrete Mathematics, Data Structures & Algorithms, Principles of Programming Languages, Database Management, Software Engineering

TECHNICAL SKILLS

Programming Languages — Java, Python, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries — React, Next.js, Tailwind CSS, FastAPI, Pedantic, Angular

Tools & Platforms — Git, Vercel, Microsoft Azure, TeamDynamix

Databases — PostgreSQL (Vercel Postgres)

PROFESSIONAL EXPERIENCE

IT Support Technician, Saint Joseph's University

08/2025 – Present

Philadelphia, Pennsylvania

- Resolved 30+ hardware and software issues weekly for classroom and staff computers, ensuring minimal downtime and maintaining productivity across academic environments
- Managed and prioritized service tickets using TeamDynamix in a 16,000+ user environment, consistently meeting response and resolution time expectations
- Assisted with user account management, permissions, and system support through Microsoft Azure, including troubleshooting access and authentication issues
- Diagnosed and resolved operating system, networking, and device-related issues across Windows and macOS systems, applying systematic troubleshooting techniques

Writing Center Receptionist, Saint Joseph's University

08/2024 – 08/2025

Philadelphia, Pennsylvania

- Delivered high-quality customer service to students, fostering a positive and professional experience
- Coordinated and scheduled student appointments to ensure efficient time management
- Resolved technical issues on laptops and tablets, providing timely troubleshooting and support.

PROJECTS

ChessKey

12/2025 – Present

[GitHub - HordVh/ChessKey](#)

TypeScript, Tailwind CSS, Angular, Vercel

- Developed an interactive chess web application using Angular, TypeScript, HTML, and CSS
- Implemented full chess game logic including legal move validation and rule enforcement
- Added board editing controls allowing users to freely add, remove, and reposition pieces for testing custom scenarios
- Designed the system with planned AI gameplay integration against Gemini
- Deployed using Vercel

Personal Portfolio Website

11/2025 – 12/2025

[GitHub - HordVh/portfoliowebsite](#)

JavaScript, HTML5UP, Vercel

- Built and customized a personal portfolio website using HTML, CSS, and JavaScript, modifying an HTML5 UP template to create a responsive and user-friendly design
- Developed and structured key sections including projects, resume, about me, and contact information to effectively showcase skills and experience
- Deployed and maintained the website using Vercel, ensuring reliable performance, fast load times, and accessibility across devices

Infra-IT

11/2025 – 12/2025

[GitHub - HordVh/Infra-IT](#)

Next.js 15 (App Router), Tailwind CSS, Recharts, Python FastAPI, pandas, openpyxl, Llama 3

- Developed InfraIT, an AI-powered IT procurement and inventory management prototype using Next.js 15, FastAPI, and Python.
- Built a full-stack architecture with RESTful APIs for inventory tracking, demand and hardware evaluation, and order generation.
- Integrated Llama 3 via Ollama to generate AI-driven forecasts, hardware evaluations, and finance-ready order justifications.
- Implemented Excel inventory ingestion and analysis using pandas and openpyxl for automated data processing workflows.
- Designed interactive dashboards with Tailwind CSS and Recharts while developing scalable modular backend services
